

DuraShade E3500 Zip Exterior

The **DuraShade E3500 Zip** is an efficient, retractable screen unit that locks the fabric into the side track to provide superior stability and does not allow the screen to move. The screen fabric is tightly locked into the tracks by a PVC channel along the edge of the track keeping tension off the zipper. This technology allows for excess pressure to be applied to the screen fabric. The **DuraShade E3500 Zip** system is a great exterior screen application for screen room enclosures and rooms which require total black out.

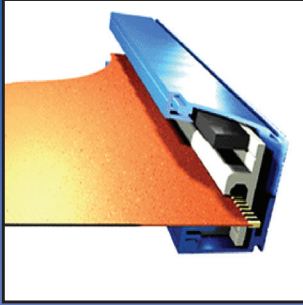

Special Features and Benefits Include:

- Fabric locks into side track
- Minimizes the entry of insects
- Fabric runs smoothly inside the guide channels
- Can assist in blocking outside noise
- Provide visual privacy from outside, while preserving window views from the inside
- High grade stainless steel fastener hardware provides better overall strength and corrosion resistance
- Multiple fabric colors and weave types available

GO GREEN on Energy Cost!

Without Durasol Solar Screen

With Durasol Solar Screen

Go Green and Reduce Heat Gain & Energy Cost

DuraShade® systems effectively reflect up to 90% of solar energy, decreasing your home's temperature. Inside temperatures of homes protected by DuraShade systems can be up to 10° F cooler than non-protected homes. During winter months, Durasol shading systems help to add an extra layer of defense by providing protection from fading and sun glare.
